EDUCATION

Montclair State University

Bachelor of Science in Computer Science

Montclair, NJ

Jan. 2021 – May 2023

EMPLOYMENT HISTORY

Software Engineer

AYA Holdings Group | Full Stack Developer

Remote

May 2023 – Sep 2024

- Architect and develop a multifaceted application serving educational, social networking, and financial opportunities, significantly improving access and user engagement.
- Implement a robust API gateway and backend infrastructure using FastAPI, enhancing system communication and data flow between the frontend, backend, and PostgreSQL database capable of supporting a large user base.
- Design and construct the front-end development using Vue.js and the Quasar framework, ensuring a responsive and intuitive user interface that aligns with the latest design standards
- Lead frontend development for a dynamic educational platform and social networking site, featuring courses, lessons, sections, quizzes, and real-time interaction tools such as posting and commenting, while translating design concepts into functional, bug-free user interfaces to ensure high-quality user experiences.
- Collaborate closely with a senior developer to deliver major project components, demonstrating strong teamwork and technical leadership
- Enhance development processes with Docker, creating consistent environments across different systems, which streamline deployment and testing phases.
- Contribute to UI/UX design discussions and database schema decisions, providing expert recommendations to optimize project outcomes.
- Evaluate and select appropriate tools and programming languages to meet project requirements, ensuring effective resource utilization and project success.

PROJECTS

Personal Portfolio | Vue.js, HTML, CSS & Quasar

- Developed a user-friendly portfolio website spotlighting personal achievements, hobbies, and completed projects deploying it as single page application (SPA) on Github Pages.
- Showcased strong software engineering and programming skills through crafting multiple projects and professional experience.
- Emphasized proficiency in HTML/CSS, Vue.js for frontend development while leveraging the Quasar Framework for hosting and styling the application.
- Integrated a contact form using the Email.js third-party library, ensuring smooth communication with website visitors.

Unlimited Drinks | Vue.js, HTML, CSS, Quasar, Python, Docker & PostgreSQL

- Engineered a cost-effective alternative to traditional vending machines, enabling bulk orders of various beverages to transform on-campus beverage access for students.
- Implemented auth0 authentication for secure and streamlined user login, prompting account setup for new user authenticated access
- Integrated Stripe for secure and efficient payment processing, enhancing the transaction experience.
- Enforced a one-review-per-item policy to maintain the integrity of the platform's review system.
- Developed features for users to manage accounts, view order history, and handle multiple addresses for flexible ordering.
- Focused on user convenience, security, and satisfaction, making the platform reliable and user-friendly

SKILLS AND COURSEWORK

Languages: HTML/CSS, Python, SQL (MySQL | Postgres), Javascript, PHP, Java, C, JSON

Developer Tools: Git, GitHub/GitHub Desktop, Docker, VS Code, Jupyter Notebook

Libraries & Frameworks: FastAPI, Flask, Vue.js, Quasar, PyTest, asyncpg, tortoise-orm

Completed Courses: Data Structures & Algorithms, Database Systems, Internet Computing (Website Development), Software Engineering I & II, Operating Systems, Computer Science Theory, Computer Networks, Computer Security

AWARDS

Summa Cum Laude

Montclair State University

- Graduated from Montclair State University with the highest Latin distinction awarded to students with exceptional GPAs
